Company Overview

Duquesne Light Company is committed to more than keeping the lights on; it powers the moments in its customers' lives. As a next generation energy company, Duquesne Light Company's nearly 1,600 employees are dedicated to delivering reliable and safe energy to more than half a million customers in southwestern Pennsylvania.

Duquesne Light Company is a leader in the transmission and distribution of electric energy, offering superior customer service and reliability to more than half a million customers in southwestern Pennsylvania.

From the industrial age to the technology era, Duquesne Light has been an integral part of the fabric of Pittsburgh and the surrounding area. Its dedicated employees have helped transform the way people live, delivering dependable energy for greater comfort and leisure, faster communications, more efficient transportation, enhanced economic development and improved health care for virtually every facet of life.

The company can trace its history back to 1880, when a small group of Pittsburgh business leaders pooled \$90,000 to form the area's first electric utility, Allegheny County Light. Leading the way in the development of the electric light and power industry, the company helped prove that alternating current is superior to direct current, which allowed electricity to become commercially viable.

Consistently among the best utilities in the state in reliability and in the top quartile in customer satisfaction nationwide, Duquesne Light invests resources to ensure that its infrastructure – the wires, transformers, substations, poles and other equipment that make up the company's transmission and distribution system – meets current and future electrical demands.

An ongoing upgrade of its metering infrastructure is putting more information in the hands of customers, enabling them to make more informed decisions about their energy consumption.

These initiatives are part of Duquesne Light's *Larger Than Light* commitment to invest more than \$2.9 billion in infrastructure between 2011 and 2021. As a next generation energy company, Duquesne Light is committed to more than keeping the lights on; it powers the moments in its customers' lives.
